Dev-C++ 5.9.2 released

Fixed a few high priority bugs in 5.9.1.

Changes - Version 5.9.1 - 1 Februari 2015

- Changed Format Current File shortcut from Shift+F to Shift+Ctrl+A.
- Removed/Changed all default Alt+(Key) shortcuts because they interfere with Alt menu navigation.
- Assigned some new default shortcuts like Ctrl+B (Open Containing Folder) and F2 (Rename File).
- Fixed Show Makefile being executable when no compiler set is configured.

Download

- The **setup** which includes **TDM-GCC 4.8.1** (32bit and 64bit) can be downloaded [here](#) (47MB).
- The **setup** which does not include a compiler can be downloaded [here](#) (2MB).
- The **portable** version which includes **TDM-GCC 4.8.1** (32bit and 64bit) can be downloaded [here](#) (34MB).
- The **portable** version which does not include a compiler can be downloaded [here](#) (2MB).
- The latest tested compilers can be downloaded [here](#).
- Lastly, the source code can be found [here](#) (1MB). Alternatively, one can use git to clone any commit. Instructions can be found [here](#).

Install and Setup

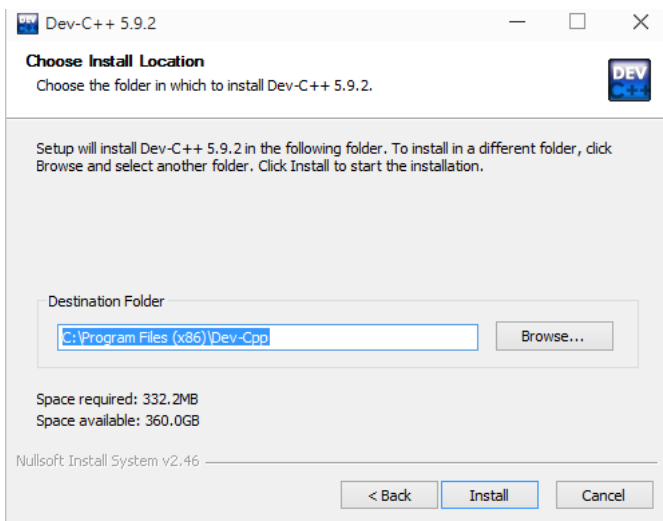

- 安裝畫面

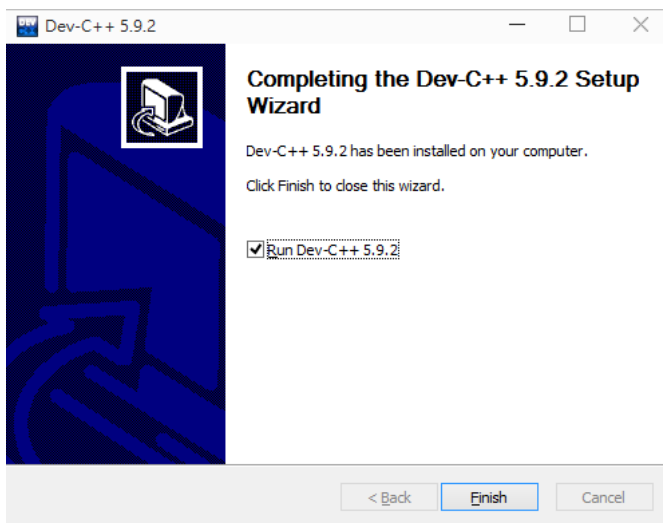

- 選擇安裝類別：Full or 自行選擇項目

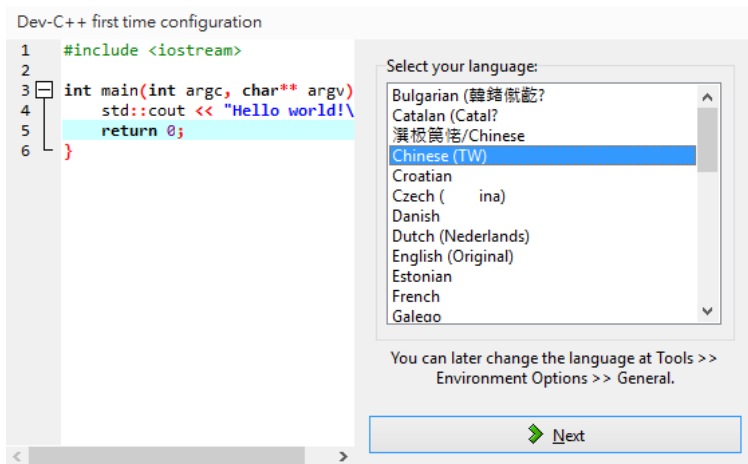

- 安裝！

- 完成！

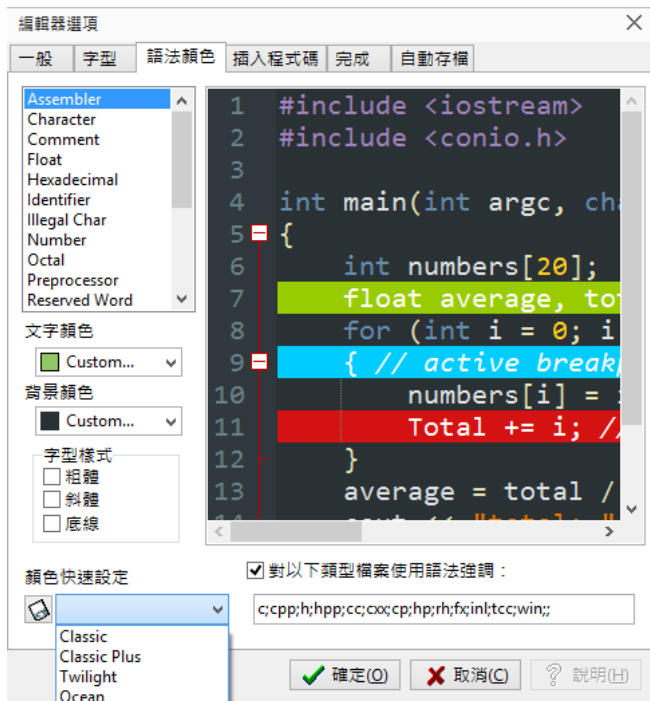

- 打開 Dev-C++
- 選擇 Chinese (TW)

- 更改字體
- 工具 -> 編輯器選項

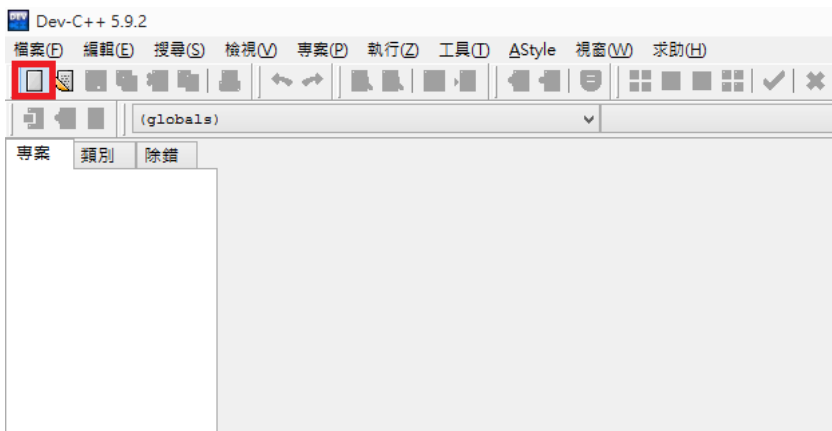

- 更改配色 -> 顏色快速設定

建立一個 `cpp` 檔案

- 選擇左上角的 開新檔案 -> 原始碼

- 寫出你的第一個程式！

- 寫出你的第一個程式！

```
1 #include <iostream>|
2 int main(){
3     std::cout << "Hello, Sprout!" << "\n";
4     return 0;
5 }
```

- 按下 <F11> 編譯並執行。
- Hello, Sprout!

```
1 #include <iostream>
2 int main(){
3     std::cout << "Hello, Sprout!";
4     return 0;
5 }
```

C:\Users\Winston\Desktop\hello.exe

Hello, Sprout!

Process exited after 0.02141 seconds with return value 0
